

SDG ALIGNMENT ANALYSIS

SDG Alignment Analysis for Career Navigator

The Career Navigator project is an AI-powered platform designed to empower individuals in their professional journeys. By leveraging advanced technologies to provide personalized career roadmaps, resume analysis, and skill development guidance, the project aligns significantly with several United Nations Sustainable Development Goals (SDGs).

1. SDG 4: Quality Education

Target 4.4: *By 2030, substantially increase the number of youth and adults who have relevant skills, including technical and vocational skills, for employment, decent jobs and entrepreneurship.*

Justification:

- **Skill Gap Analysis:** The project identifies specific areas where users need improvement, effectively acting as a personalized educational diagnostic tool.
- **Personalized Roadmaps:** By generating tailored career paths, the platform guides users toward the most relevant learning resources and certifications.
- **Continuous Learning:** The progress tracking and project recommendation features encourage a culture of lifelong learning and self-improvement.

SDG ALIGNMENT ANALYSIS

2. SDG 8: Decent Work and Economic Growth

Target 8.5: *By 2030, achieve full and productive employment and decent work for all women and men, including for young people and persons with disabilities, and equal pay for work of equal value.*

Justification:

- **Resume Intelligence:** By optimizing resumes through AI analysis, the platform increases the likelihood of users securing interviews and employment.
- **Interview Preparation:** Providing AI-driven mock interview support prepares candidates for the competitive job market, enhancing their employability.
- **Career Matching:** The platform helps users find roles that match their existing skills while showing them how to bridge gaps for higher-value roles, promoting economic productivity.

3. SDG 9: Industry, Innovation, and Infrastructure

Target 9.b: *Support domestic technology development, research and innovation in developing countries...*

Justification:

- **Innovative AI Application:** The use of Large Language Models (LLMs) to automate career counseling is a significant innovation in the "EdTech" and "HRTech" sectors.
- **Scalable Infrastructure:** As a digital platform, it provides a scalable infrastructure for

SDG ALIGNMENT ANALYSIS

career guidance that can reach thousands of users simultaneously, overcoming the limitations of traditional, human-centric counseling.

4. SDG 10: Reduced Inequalities

Target 10.2: *By 2030, empower and promote the social, economic and political inclusion of all, irrespective of age, sex, disability, race, ethnicity, origin, religion or economic or other status.*

Justification:

- ****Democratizing Guidance:**** High-quality career coaching is often expensive. This AI-powered tool provides premium-level career advice at a fraction of the cost (or for free), making professional growth accessible to individuals from diverse socio-economic backgrounds.
- ****Bias Reduction:**** AI, when properly implemented, can provide objective feedback on resumes and skills, potentially reducing the impact of human bias in the early stages of career planning.

Summary Table

| SDG Goal | Project Feature | Impact |

| :--- | :--- | :--- |

| SDG 4 | Skill Gap Analysis, Roadmaps | Enhances technical and vocational skills. |

SDG ALIGNMENT ANALYSIS

| SDG 8 | Resume Scoring, Interview Prep | Promotes productive employment and decent work. |

| SDG 9 | AI-Powered Assistant | Drives innovation in educational technology. |

| SDG 10 | Accessible AI Coaching | Reduces inequality in access to career resources. |
